TITLES AND KEYWORDS

A
added mass 272
Added mass effects in two-phase solid/liquid media, Mahgerefteh, H. and Khodaverdian, A. 272
additives 744, 782
adhesional force 616
adhesive hard sphere potential 723
adipic acid 744
aerated stirred tank 853
agglomeration 133, 759
aggregation 803
Aggregation in precipitation reactions: stability of primary particles, Zukoski, C.F., Rosenbaum, D.F. and Zamora, P.C. 723
agitated boiling 424
agitation 431, 451, 658
agitation intensity 853
agitator radiality 658
air flow reversals 882
Alternate eddy shedding set up by the non axisymmetric recirculation zone at the exhaust of a cyclone dust separator, Yazdabadi, P.A. and Griffiths, A.J. 363
aluminium smelting 913
animal cell culture 575
anistropy 627
aqueous micellar solution 242
aqueous processing 563
arabinogalactan 782
artifical neural networks 689
attrition 812
Automated synthesis of complex reaction/separation processes using dynamic programming, The, Fraga, E.S. 249
axial impeller 476
Axial liquid mixing in a gas-liquid multi-stage agitated contactor (MAC), Breman, B.B., Beenackers, A.A.C.M., Bouma, M.J. and Van der Werf, M.H. 669
axial mixing 456

B
barium sulphate 821
batch 584
batch chemical reactors 3
batch crystallization 791
Batch distillation of multicomponent systems with constant relative volatilies, Barolo, M. and Guarise, G.B. 863
Batch-precipitation of calcium carbonate from highly supersaturated solutions, Kabasci, S., Althaus, W. and Weinspach, P.-M. 765
bench-scale tests 563
binary breakup 554
biological gas treatment 123
bioprocess intensification 575
Bioprocess intensification through bioreactor engineering, Chisti, Y. and Moo-Young, M. 575
bioreactors 575
blade thickness 369
blend time 390
boiling reactors 424
Boil-off and power demand in gas-liquid reactors, Smith, J.M. and Millington, C.A. 424
borax pentahydrate 133
boric acid 133
boric oxide 133
boundary conditions 944
breakage 812
bubble columns 406, 456
bubble detection 397
bubble mechanics 492
bubbles 281, 463
bubble size 406
bypass 882

C
CAD 849
calcite 759
calcium carbonate 765
calcium phosphate 797
Calorimetric methods for the study of batch crystallization processes: some key results, Févotte, G. and Klein, J.P. 791
calorimetry 340, 791
capillarity 206
capillary breakup 554
cascade control 38
catalysis 563
catalytic hydrogenation 635
catalytic reactors 649
cation incorporation 739
cavern 438
cavitation 511
ceramic 329
CFD 476, 492, 499
CFD predictions of stirred tank flows, Xu, Y. and McGrath, G. 471
CFD simulation 471
CFD studies of separation of mists from gases using vane-type separators, Wen Wang and Davies, G.A. 232
Characterization of growth behaviour of small paracetamol crystals grown from pure solution, Finnie, S., Ristic, R.I., Sherwood, J.N. and Zikic, A.M. 835
Chemical processing in high-pressure aqueous environments: low-temperature catalytic gasification, Elliott, D.C. and Sealock, Jr, L.J. 563
chloroacetic acids 773
chocolate extrusion 281
circulation efficiency 658
clean technology 732

closed-loop identification 30
Closed-loop identification of second order dead time process models, Krishnaswamy, P.R. and Rangaiah, G.P. 21
coalescence 158
colloidal stability 723
colloid mill 554
combustion 281
Compartment mixing model for stirred reactors with multiple impellers, Cui, Y.Q., Van der Lans, R.G.J.M., Noorman, H.J. and Luyben, K.Ch.A.M. 261
compartment model 261
Composition-front scanning of porous media, Buffham, B.A., Mason, G. and Koash, K. 627
computational fluid dynamics 232
Computational snapshot of flow generated by axial impellers in baffled stirred vessels, Ranade, V.V. and Dommeti, S.M.S. 476
Computer-aided molecular design of solvents for liquid-liquid extraction, A, Meniai, A.-H. and Newsham, D.M.T. 695
concentrated emulsion 554
contactor 183
control 21, 63, 901
Control of batch reactors: a review, Berber, A. 3
Control of molecular crystals morphology, Pfefer, G. and Boistelle, R. 744
copolymerization 340
correlation 390
Correlation of transient sizes of highly viscous drops in dispersion process in liquid-liquid agitation, Kuriyama, M., Ono, M., Tokanai, H. and Konno, H. 431
CO shift 649
critical circulating frequency 451
critical gas saturation 197
cross-directional control 689
crossflow electrofiltration 517
crossflow filtration 546
crystal habits 744
crystallization 821, 828, 835, 839
crystallization mechanism 797
Crystallization - meeting the environmental challenge, Sharratt, P.N. 732
cut methods 321
cyclohexanone 349
cyclone dust separator 363

D
Damkohler number 703
deaeration 177
decentralized control 35
dehydration 133
densimetry 340
deoxygenation 183
depressurization 197
desanding 166
design 863
Design of energy storage systems for batch process plants, Sadr-Kazemi, N. and Polley, G.T. 584
Designing dryers using heat and mass exchange networks: an application to conveyor belt dryers, Sebastian, P., Nadeau, J.P. and Puiggali, J.R. 934
Design and operation of oil-gas production separator desanding systems, The, Priestman, G.H., Tippetts, J.R. and Dick, D.R. 166
Design of optimal thermally-coupled distillation systems using a dynamic model, Hernández, S. and Jiménez, A. 357
detergents 517
Determination of 3-D flow fields in agitated vessels by laser-Doppler velocimetry: effect of impeller type and liquid viscosity on liquid flow patterns, Mavros, P., Xuereb, C. and Bertrand, J. 658
Determination of heterogeneous nucleation rates, Schubert, H. and Mersmann, A. 821
Development of a regime-based framework for the analysis of wettability experiments, The, McDougall, S.R., Dixit, A.B. and Sorbie, K.S. 206
development of small fields 149
diakoptics 321
diffusivity 242
direct contact cooling 750
Discriminating between size-enlargement mechanisms, Van Peborgh Gooch, J.R., Hounslow, M.J. and Mydlarz, J. 803
dispersion 445, 803
dissipation rate 390
Dissociation extractive crystallization: separation of di and trichloroacetic acids, Lashanizadegan, A. and Tavare, N.S. 773
distillation dynamic model 357
distillation sequences 357
distribution coefficient 242
Distribution of energy between convective and turbulent flow for three frequently used impellers, Zhou, G. and Kresta, S.M. 379
drinking water treatment 546
drop breakup 431
drop coalescence 431
Droplet breakup mechanisms during emulsification in colloid mills at high dispersed phase volume fraction, Wieringa, J.A., Van Dieren, F., Janssen, J.J.M. and Agterof, W.G.M. 554
droplet size distribution 232
drops 445
drop size 431
dynamic heat methods 669
dynamic method 872
Dynamic model for the energy balance of an electrolysis cell, A, Taylor, M.P., Zhang, W.D., Wills, V. and Schmid, S. 913
dynamic programming 249
dynamic spargers 456

E
eddy shedding 363
Effect of agitation intensity on gas-liquid reaction in variable volume systems, Wei-Ming Lu and Shin-Jon Ju 853
Effect of honeycomb inserts on axial mixing in bubble columns, Al Taweel, A.M., Ramadan A.M., Moharam, M.R., El Mofty, S.M. and Ityokumbul, M.T. 456
Effects of non-Newtonian fluid and porous medium parameters on two-phase flow in porous media, Chiu, T.W., Wakeman, R.J., Harris, P.R. and Meuric, O.F.J. 220
Effect of wine polysaccharides on the nucleation of potassium hydrogen tartrate in model solutions, Gerbaud, V., Gabas, N., Laguerie, C., Blouin, J., Vidal, S., Moutounet, M. and Pellerin, P. 782
efficiency of energy utilization 445
Electric field intensification of surfactant mediated separation processes, Akay, G. and Wakeman, R.J. 517
electrofiltration 517
electrolysis 913
Electrostatic destabilization of water-in-oil emulsions under conditions of turbulent flow, Urdahl, O., Williams, T.J., Bailey, A.G. and Thew, M.T. 158
electrostatic interactions 113
electrostatic separation 526
elevated pressure 856
emulsification 554
emulsions 158, 445, 526
energy balance 913
energy dissipation rate 679
energy efficiency 584
energy integration 357
enhanced acceleration field 183
environment 190
estimation 63
extraction 695

F
facilitated transport 703
Fault detection and diagnosis using multivariable statistical techniques, Zhang, J., Martin, E.B. and Morris, A.J. 89
fermentation technology 575
Fickian dispersion model 944
flow 605, 616
flow maldistribution 882
flow modelling 476
flow patterns 499
flow in porous media 197
flow transients in adsorption 627
fluidization 166

Formation and growth of cavern in yield stress fluids agitated under baffled and non-baffled conditions, Hirata, Y. and Aoshima, Y. 438
fuzzy control 70, 77
Fuzzy relational model based control applying stochastic and iterative methods for model identification, Sing, C.H. and Postlethwaite, B. 70

G
gas absorption 856
gas flow regime 406
gas holdup 397, 456
Gas holdup and interfacial area distributions in a mechanically agitated gas-liquid contactor, Barigou, M. and Greaves, M. 397
gasification 563
gas injection 190
gas-liquid dispersion 463
gas-liquid flow 567
gas-liquid mass transfer 872
Gas-liquid mass transfer coefficient (k_La) in the gas-liquid multi-stage agitated contactor (MAC), The, Breman, B.B., Beenackers, A.A.C.M., Bouma, M.J. and Van der Werf, M.H. 872
Gas-liquid mixing studies: a comparison of Rushton turbines with some modern impellers, Nienow, A.W. 417
gas-liquid reaction 853
gas/mist separation 232
gas sparger 406
genetic algorithms 97
gravimetry 340
growth 803, 812, 828
growth flow system 744
growth kinetics 750
growth rate dispersion 835

H
H_2S gas treated with *Thiobacillus ferooxidans*: overall chemical process performance and the chemical step, Pagella, C., Silvestri, P. and de Faveri, D.M. 123
Heat exchanger design through parameter plotting, Poddar, T.K. and Polley, G.T. 849
heat flux measurement 239
Heat flux monitoring during cryogenic pipe freezing: a case study, Tavner, A.C.R., Bowen, R.J. and Bishop, C.W. 239
heat shield 901
heat storage 584
heterogeneity 627
heterogeneous nucleation 821
high-dimensional optimal control 55
highly viscous drop 431
high pressure 563
High resolution imaging of crystalline agglomerates, Collier, A.P., Hetherington, C.J.D. and Hounslow, M.J. 759
High temperature CO shift conversion (HTSC) using catalytic membrane reactors, Ettouney, H.M., Masiar, B., Bouhamra, W.S. and Hughes, R. 649
hollow fibre 856
hydrodynamical dispersions 944
hydrofoil impellers 417
hydrogen sulphide 123

I
impeller power 424
impellers 379
Improved control using dynamic process models, Gawthrop, P.J. and Ponton, J.W. 63
Improved MIMO system identification and control using genetic algorithms, Cox, C.S., French, I.G. and Ho, C.K.S. 97
induction 828
induction time 797
industrial crystallization 715
Influence of the gas sparger on the hydrodynamic behaviour of bubble columns, Hebrard, G., Bastoul, D. and Roustan, M. 406
Influence of local variations of air velocity and flow direction reversals on the drying of stacked timber boards in kilns, Nijdam, J.J. and Keey, R.B. 882
Influence of metal ion inclusion on the morphology of gibbsite, The, Mei-Yin Lee, A.L. Rohl, Gale, J.D., Parkinson, G.M. and Lincoln, F.J. 739
Influence of Rushton impeller blade and disk thickness on the mixing characteristics of stirred vessels, The, Rutherford, K., Mahmoudi, S.M.S., Lee, K.C. and Yianneskis, M. 369
inhibition 797
initial supersaturation 797
inner axial/radial eddy 363
inserts 456
instrumentation 239
intensive processing 517
interactions 839
interfacial area 397
interrupted integral 21
IOR 190
isolation 239
iterative dynamic programming 55

J
jet mixed vessel 390
jet mixing 390
Joint use of calorimetry, densimetry and mathematical modelling for multiple component polymerizations, McKenna, T.F., Févotte, G., Graillat, C. and Guillot, J. 340

L
Laminar and turbulent flow pattern of a pitched blade turbine, The, Bakker, A., Myers, K.J., Ward, R.W. and Lee, C.K. 485
laser-Doppler 485
laser Doppler velocimetry 658
LDA 369
Levenberg-Marquardt 689
Lightnin A310 658
liquid distribution 177
liquid liquid system 431
liquid phase 563
liquid phase dispersion 406
liquid properties 872
Long-range predictive control using fuzzy process models, Linkens, D.A. and Kandiah, S. 77
Long-term maintenance policy optimization in multipurpose process plants, Dedopoulos, I.T. and Shah, N. 307
low temperature 563

M
maintenance 307
mannoprotein 782
marginal fields 149
mass transfer 106, 113, 177, 183, 349, 417, 492, 567, 703
mass transfer model 242
Mass transfer in parallel-plate separation devices with non-equilibrium facilitated reactive membranes, Leu, L.-P., Lin, C.-C. and Stroeve, P. 703
Mass transfer of solubilized solutes in aqueous micellar solutions, Asai, S., Nakamura, H., Kimura, Y. and Sakamoto, M. 242
Matrix methods for pipe network analysis: observations on partitioning and cut methods, Houache, O., Khezzar, L. and Benhamza, M.H. 321
Measurement of the adhesional force between individual particles with moisture present. Part 1: a review, Harnby, N., Hawkins, A.E. and Opalinski, I. 605
Measurement of the adhesional force between individual particles with moisture present. Part 2: a novel measurement technique, Harnby, N., Hawkins, A.E. and Opalinski, I. 616
measurement of supersaturation 791
mechanically-agitated contactor 492
mechanism discrimination 803
Mechanism of sodium gluconate poisoning of gibbsite precipitation, The, Rossiter, D.S., Ilievski, D., Smith, P.G. and Parkinson, G.M. 828
membrane 113
membranes 329, 649
methanation 563
methodology 715

Micellar-catalysed oximation of cyclohexanone by sodium dodecyl sulphate, Asai, S, Nakamura, H., Yamaguchi, H. and Shimizu, H. 349
micellar catalyst 349
microfiltration 329
MIMO systems 97
miscible displacement 627
Mixel TT 658
mixing 261, 379, 397, 438, 451, 485, 499, 658
Mixing time and power consumption for a liquid in a vertical cylindrical vessel, shaken in a horizontal circle, Kato, Y., Hiraoka, S., Tada, Y., Koh, S.T. and Lee, Y.S. 451
mixing times 417
model-based control 3, 63, 77
modelling 340, 649, 739
Modelling of the energy balance and environmental load of gas injection projects, Taggart, J.P. 190
Modelling gas-liquid turbulent tube reactors: a model incorporating variable hold-up and compressible flow with multiple gas injections and recycling of slurry, Cantero, H.J., Grau, R.J. and Baltanás, M.A. 635
Modelling the performance of a packed column subjected to tilt, Tanner, R.K., Baker, S.A., Millar, M.K. and Waldie, B. 177
modern hydrofoil impellers 679
Modification of SiA1ON microfilters by pressureless sintering, pyrolysis of organometallic precursors and nitridation of thin films, Wakeman, R.J., Henshall, J.L. and Ng, S.G. 329
moisture 605, 616
moisture content variation 882
molecular graphics 695
molecular mechanics 744
momentum source model 471
monodispersity 839
Morecambe Bay 149
morphology 739, 835
multi-loop control 38
multiphase 220
multiple-conveyor dryer 934
multiple impellers 261
multiple injection 635
multipurpose plants 307
multi-stage agitated gas-liquid contractor 669
multi-stage contactor 872

N
nanoparticles 723
natural gas processing 149
network 934
network model 197, 206
networks 321
New aspects of cascade and multi-loop control, Eker, I. and Johnson, M.A. 38
New high intensity contactor for deoxygenation of water, A, Waldie, B. 183
New process to produce granular boric oxide by high temperature dehydration of boric acid in a fluidized bed, A, Gürbüz-Beker, Ü. and Buluctu, N. 133
New theory improves the correlation of blend time data from turbulent jet mixed vessels, A, Grenville, R.K. and Tilton, J.N. 390
Niederlinski Index 35
nitrate removal 546
non-Newtonian 220
non-Newtonian fluids 438
non-uniformity 627
normal unmanned 149
Novel redistributor concept for packed columns, A, Baker, S.A. and Waldie, B. 106
Novel static mixer for the effective dispersion of immiscible liquids, A, Al Taweel, A.M. and Chen, C. 445
nuclear magnetic resonance (NMR) 281
nucleation 782, 812, 828
number of transfer units method 934
Numerical computation of turbulent gas-liquid dispersion in mechanically agitated vessels, Djebbar, R., Roustan, M and Line, A. 492
Numerical convergence properties of iterative dynamic programming when applied to high dimensional systems, Luus, R. 55
Numerical modelling of the mixing of viscoplastic slurries in a twin-blade planetary mixer, Tanguy, P.A., Bertrand, F., Labrie, R. and Brito-de la Fuente, E. 499

O
Occurrence, stability, kinetics of crystallization and polymorphic transition of the A, B and C modification of abecarnil: influence of supersaturation, temperature, solvents and impurities, Beckmann, W. and Otto, W.H. 750
offshore 166, 177
oil-gas production separators 166
oil recovery 197
on-line control 340
optimization 249
Origin of insights in chemical engineering, The, Davidson, J.F. 281
oscillatory flow 541
outer engulfment eddy 363
overdesign 849
oximation 349

P
packed beds 627
packed column 106, 177
packed sieve tray 893
packing 893
paracetamol 835
parameter estimation 30, 689
particle 605, 616
particle image velocimetry 485
Particle suspension in the turbulent regime: the effect of impeller type and impeller/vessel configuration, Ibrahim, S. and Nienow, A.W. 679
permeability tensor 220
phase transformation 750
pH control 70
physicochemical properties 715
PIP 97
pipe freezing 239
pipes 321
pitched blade turbine 485
planetary mixer 499
plastic extrusion process 689
plug flow 541
poisoning 828
polymorphic transformations 765
polymorphism 750
pore-scale 206
porous media 220, 627
potash alum 803
potassium hydrogen tartrate 782
potassium sulphate 803
powder 605, 616
power consumption 451, 499
Power dissipation and holdup in a gassed reciprocating baffle-plate column, Baird, M.H., Rama Rao, N.V. and Stonestreet, P. 463
power draw 417
power law 220
power number 438
precipitation 723, 765, 821, 828
Prediction of packed sieve tray efficiency in distillation, Xu, Z.P., Afacan, A. and Chuang, K.T. 893
predictive control 77
Prenucleation and crystallization of proteins: application to BPTI solutions, Lafont, S., Veesler, S., Astier, J.P. and Boistelle, R. 839
principal component analysis 89
process 21
process control 791
process design 732
process development 715
process industry 38

process intensification 183, 517, 526
process monitoring 89
process synthesis 249
production planning 307
Production and processing of marginal and/or difficult fields, The: North Morecambe Onshore Terminal, Mayer, M. and Crowe, T. 149
properties for industrial exploitation 715
properties in use 715
protein 113, 839
Proteins transport through charged porous membranes, Causserand, C., Miereles, M. and Aimar, P. 113

R
reaction 249
Reactive crystallization of calcium phosphate, Tsuge, H., Yoshizawa, S. and Tsuzuki, M. 797
reactive precipitation 773
reactor 541
reciprocating plates 463
recycle 635
redistributor design 106
relational model identification 70
Relations between the properties of particles and their process of manufacture, Tanguy, D. and Marchal, P. 715
relative gain array 35
relative humidity 605, 616
relaxation 944
relaxation time 944
Remark on the measurement of gas throughflow velocity, Gera, D. and Gautam, M. with commentary by Davidson, J.F. 137
research planning 281
research policy 281
Residence time distribution enhancement in reactors using oscillatory flow, Mackley, M.R., Stonestreet, P., Roberts, E.P.L. and Ni, X. 541
RGA 97
RGA as a measure of integrity for decentralized control systems, Zhu, Z.-X. and Jutan, A. 35
rhamnogalacturonan 782
robustness 38
Robust Smith predictor, A, Whalley, R. and Zhang, Z. 21
rock cores 627
rotary calciner 901
Rushton impeller 369
Rushton turbine 658

S
Sauter mean size 431
scale-up 511
second-order model 30
Second order optimization methods for use with an artifical neural network estimator used in a plastic extrusion process, Corscadden, K.W. and Duncan, S.R. 689
seeding 791
SEM 759
semi-batch system 853
separation 158, 249, 773
shaking vessel 451
short-cut 863
sieve tray 893
Simulation and control of an industrial rotary calciner with a heat shield around the combustion zone, Ciftci, S. and Kim, N.K. 901
Smith predictor 21
sodium dodecyl sulphate 349
sodium sulphite oxidation 853
solids separation 166
solubility 723, 839
solubilized solute 242
solution gas 197
solvent 695
solvent design 695
sonochemistry 511
sorption effect 627
sparged boiling 424
Spatial unsteadiness - a way towards intensive gas-liquid reactors, Hills, J.H., Azzopardi, B.J. and Barhey, A.S. 567
spray drying 750
static mixers 445
stirred tank flows 471
stirred tanks 379, 485
stirred vessel 261, 369, 397, 476
structure 605, 616
Supersaturation and nucleation, Mersmann, A. 812
surface nucleation 821
surfactant electrofiltration 517
surfactant enhanced filtration 546
Surfactant-mediated separation processes:surfactant-enhanced crossflow filtration in nitrate removal from water, Yildiz, E., Pekdemir, T., Keskinler, B. Cakici, A. and Akay, G. 546
surfactant mediated separations 517
surfactants 517
surfactant separation 517
system identification 97
system integrity 35
system stability 35

T
Takagi-Sugeno fuzzy model 77
TEM 759
ternary phase diagram 773
Theoretical model for the depressurization of waterflooded reservoirs, Hawes, R.I., Dawe, R.A. and Evans, R.N. 197
Theory and practice of electrically-enhanced phase separation of water-in-oil emulsions, Taylor, S.E. 526
thermally coupled distillation 357
Thiobacillus applications 123
Thiobacillus ferrooxidans 123
tilt 177
timber drying 882
transducer 272
tray efficiency 893
trichloroacetic acid-piperazine complex 773
turbulence 158, 379, 390, 485, 492
turbulent energy dissipation 379
turbulent kinetic energy 390
turbulent tube reactor 635
two-fluid model 492
two-phase 272

U
ultrafiltration 113
Ultrasonic intensification of chemical processing and related operations: a review, Mason, T.J. and Cordemans, E.D. 511
ultrasonics 511
Ultrathin skinned hollow fibre module for gas absorption at elevated pressures, An, Li, K. and Teo, W.K. 856
unsteady drop size 431

V
variable holdup 635
variable pairing 35
variable pressure 635
vaterite 765
venturi 567
vessel configuration 679
viscoplastic fluids 499

W
waste minimization 732
waste organics 563
water 183
water-in-oil emulsions 158, 526
Wave concept in the theory of hydrodynamical dispersion - a Maxwellian type approach, Westerterp, K.R., Kronberg, A.E., Benneker, A.H. and Dil'man, V.V. 944
wettability 206

Y
yield stress 438
